Evgeniy Babiychuk

I am a web and mobile developer with 8 years of experience, specializing in React and React Native. Throughout my career, I have successfully created and enhanced numerous web and mobile apps, working across various industries including e-commerce, social media platforms, blockchain, data visualizations, and SaaS projects. I am always eager to explore new technologies and seek out fresh opportunities in this field. Before starting work on a project, I think ahead how it should be in the end, introducing myself as a consumer of the project. I excel at working collaboratively to solve complex problems and enjoy being part of a team.
